Solar eclipse

Monday, April 8th, 2024

PROTECT YOUR EYES!

On April 8th, 2024, a solar eclipse will take place in the Québec sky.

A spectacular and rare phenomenon, a solar eclipse occurs when the Moon passes between the Earth and the Sun, casting its shadow on the Earth.

CAUTION!

Don't look at the solar eclipse with the naked eye for the duration of the event. Looking at the eclipse without suitable protection can cause serious permanent damage to your eyes.
